

LED Linear Vapor Tight Fixture

This durable fixture is an energy-efficient lighting solution designed for demanding environments. Its sealed construction protects against moisture, dust, and corrosion.

Product Overview

Durable Lighting Solution

The LED Linear Vapor Tight Fixture is a high-performance lighting solution engineered for demanding environments where moisture, dust, and corrosion are concerns. Featuring a robust, sealed housing and secure latches, this fixture ensures reliable operation in harsh conditions such as parking garages, warehouses, and food processing facilities. Its energy-efficient LED technology provides bright, uniform illumination while significantly reducing maintenance costs and energy consumption.

Key Features

Core Benefits

- Sealed construction for moisture and dust protection
- Corrosion-resistant housing
- Energy-efficient LED technology
- Low-profile design
- Surface mount installation

Applications

Recommended Use Cases

Parking Garages, Warehouses, Food Processing Plants, Industrial Facilities
