

LED Matrix Display Unit

This LED display unit uses a matrix of red and gray LEDs. It features a control panel for adjusting display settings and is suitable for indoor wall or ceiling mounting.

Overview

Versatile Information Display

The LED Matrix Display Unit is a professional-grade solution designed for clear information dissemination. Featuring a high-contrast matrix of red and gray LEDs, it is capable of rendering text, numbers, and simple graphics. Its sleek, silver-colored housing and versatile mounting options make it an ideal choice for indoor informational signage, advertising, or industrial control applications.
