

LED Miniature Replacement Bulb

This LED miniature bulb replaces standard incandescent bulbs in automotive and other applications. It provides enhanced brightness and energy efficiency, featuring a standard base for easy installation in indicator lights and interior lighting.

Overview

High-Efficiency LED Miniature Bulb

This LED miniature bulb is engineered as a direct replacement for traditional incandescent lighting in automotive and general-purpose applications. Featuring multiple LED chips, it delivers superior brightness and energy efficiency compared to standard bulbs. Its durable construction is specifically designed to withstand vibration and shock, ensuring reliable, long-lasting performance in demanding environments.

Key Performance Metrics

1 High

Energy Efficiency

1 High

Vibration Resistance

Key Features

- Direct incandescent replacement
- Multi-LED design for enhanced brightness
- Standard base for easy installation
- Vibration and shock resistant construction

Common Applications

Automotive, Indicator Lights, Interior Lighting
