Overview

High-Performance Modular Floodlighting

This LED module floodlight is engineered for high-intensity area and security lighting applications. Featuring a robust die-cast aluminum housing and tempered glass cover, it ensures durability and excellent thermal management in harsh outdoor environments. Its modular design allows for versatile power options and easy maintenance, making it an ideal choice for parking lots, building facades, and large outdoor spaces.

Technical Specifications

Available Power Ratings	200W, 250W, 300W, 500W
Glass Transmittance	95 %
Housing Material	Die-cast aluminum
Cover Material	Tempered glass

Key Features

Key Features

- High-efficiency SMD LED technology
- Excellent integrated heat sink design
- Modular architecture for scalability
- Weatherproof construction
- High-power PC reflector
