Product Overview

Smart Illumination Solution

This LED motion sensor light is designed for automatic, hands-free illumination in dark environments, making it an ideal choice for closets, hallways, and under-cabinet lighting. Featuring a built-in motion sensor, it ensures energy efficiency by activating only when movement is detected. The unit is battery-powered for easy, wire-free installation, offering a sleek and modern design that integrates seamlessly into any professional or residential space.

Technical Specifications

LED Quantity	9
Max Sensor Range	3 m
Sensor Delay Time	25s ± 5s

Power & Performance

Operating Runtime

5 h

Min Runtime

6 h

Max Runtime

Power Source	3x AA Batteries, Battery Operated
