Product Overview

High-Performance Outdoor Illumination

This versatile LED flood light series offers a comprehensive range of power options from 10W up to 200W, making it suitable for diverse applications including parking lots, building facades, and general security lighting. Engineered for durability, the units feature robust construction and an IP66 rating to ensure reliable performance against dust and water ingress in demanding outdoor environments. These lights provide an energy-efficient, long-lasting solution that serves as an ideal replacement for traditional lighting fixtures.
