Overview

High-Efficiency LED Panel Lighting

This LED panel light features high-brightness imported chips and advanced automatic packaging technology for superior stability and light quality. Designed for easy replacement, it maintains compatibility with traditional lamp sizes while offering excellent heat dissipation through its high-quality aluminum radiator. The DC drive ensures flicker-free, noise-free operation, providing significant energy savings compared to traditional lighting solutions.

Technical Specifications

Round Model Wattage

- 6
- 8
- 12

Square Model Wattage

- 8

Performance Metrics

Energy Savings

62 %

Energy Reduction

Efficiency Comparison

5W LED provides equivalent brightness to 13W traditional energy-saving lamp

Construction & Design

Radiator Material	High-quality aluminum
Drive Type	DC drive (Noise-free and flicker-free)

Features

Key Features	High Stability, High Light Efficiency, Flicker-Free, Noise-Free, Easy Installation
