

# LED Panel Mount Indicator Light

This signal lamp operates at 230VAC and 50Hz. The lamp features an LED indicator with multiple color options.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency LED Signal Lamp

This modular signal lamp is engineered for reliable visual signaling in industrial control circuits. With a compact design suitable for both DIN rail and panel mounting, it provides a flexible solution for status indication. The energy-efficient LED technology ensures minimal power consumption and long-term performance in various environmental settings.

## Technical Specifications

### Service Life

**30000 hours**

Service Duration

### Product Features

Modular Design • Low Power Consumption • Easy Installation • LED Illumination

Rated Voltage	230 V
Rated Frequency	60 Hz
Indicator Colors	Red, Green, Yellow, White, Blue

## Installation

### Mounting Methods

- 35mm DIN rail
- Panel mounting
