

# LED Roadway Luminaire

This LED street light is engineered for illuminating roadways, parking lots, and other outdoor spaces. It features a durable, weatherproof housing and high-output LED chips for long-lasting performance.

## Overview

### High-Performance LED Roadway Luminaire

This high-performance LED street light is engineered for efficient and reliable illumination across roadways, parking lots, and diverse outdoor environments. Featuring a robust, weatherproof housing, it ensures long-term durability while reducing maintenance costs through its high-output LED technology. The design incorporates effective heat dissipation to maintain optimal performance and includes a universal mounting bracket for versatile installation on poles or walls.

## Technical Specifications

### Housing & Build

Weatherproof • Heat Dissipation Design

### Beam Distribution

Wide beam angle for uniform light distribution

### Mounting Options

Pole Mount, Wall Mount

## Benefits

### Key Advantages

- Energy-efficient operation
- Reduced maintenance costs
- High-output LED chips
- Enhanced visibility and safety
