Product Overview

Industrial Safety Lighting

This LED rotating warning light bar is engineered for demanding environments such as mining operations and industrial sites. It utilizes high-intensity LED technology to ensure maximum visibility, housed within a durable, weather-resistant polycarbonate construction. Designed for both vehicles and stationary equipment, this solution provides critical visual alerts to enhance safety in hazardous areas.

Technical Specifications

Operating Voltage	DC 12V
Lighting Modes & Functions	Rotating Beacon, High-Intensity LED, Alley Light Control, Flash Mode Selection
Build Quality	Polycarbonate Lens, Weather-Resistant Housing

Controller Interface

Controller Capabilities

- Digital display interface
- Power status indicator
- Alley light control
- Flash mode selection

Product Compatibility

A wide range of high-intensity LED warning lights and rotating beacons designed for hazardous environment signaling.
