

LED Side Mirror Turn Signal Indicator

This LED side mirror turn signal indicator is designed for automotive applications. It provides enhanced visibility for signaling turns and lane changes with its bright amber LEDs and durable housing.

Product Overview

Enhanced Visibility and Safety

This LED side mirror turn signal indicator is designed for high-performance automotive applications, providing superior visibility for signaling turns and lane changes. Featuring a series of bright, high-intensity amber LEDs, the unit is encased in a durable housing engineered for long-lasting reliability. Its sleek, curved design ensures seamless integration with existing side mirrors, making it an ideal upgrade for improved road safety.

Technical Specifications

Light Color	Amber
