

# LED Solar Garden Light

This LED garden light uses high conversion polysilicon solar panels and a die-cast aluminum lamp body. It features fast charging and includes a lithium battery.

## ADDITIONAL IMAGES

## Product Overview

### Solar-Powered Outdoor Illumination

This LED solar garden light is an energy-efficient solution for outdoor spaces, featuring a high-conversion solar panel and a durable die-cast aluminum body. Designed for reliability, it includes a 6000mAh lithium battery that powers 98 SMD5730 LEDs, providing 6-8 hours of illumination. With its weather-resistant construction and automatic light sensor switch, it is ideal for enhancing the safety and aesthetics of gardens, patios, and pathways.

## Technical Specifications

Solar Panel Voltage	6 V
LED Quantity	98
LED Type	SMD5730
Battery Capacity	6000 mAh
Key Features	Light Sensor Switch, Die-cast Aluminum Body, Polysilicon Solar Panel, Weather-resistant

## Performance

### Performance Metrics

**6 hours**  
Charge Time

**7 hours**  
Average Lighting Time
