

# LED Solar Street Light

This LED solar street light provides bright and reliable illumination for outdoor areas. It features a waterproof IP65 rating and a long-lasting battery for extended performance.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Solar Lighting Solution

This European-style solar street light provides a robust, energy-efficient outdoor lighting solution suitable for streets and pathways. Featuring an integrated design, it eliminates the need for external electricity or complex cabling, ensuring easy installation. The system utilizes advanced adaptive lighting technology to maintain operation during extended rainy periods, while an integrated PIR motion sensor optimizes energy consumption.

## Technical Specifications

### Luminous Efficacy

**190 lm/W**

Luminous Efficacy

**3000 lm**

Total Brightness

### Durability & Protection

IP65 Waterproof, Aluminum Alloy Case, TCS Battery Protection

### Operating Temperature

-20°C to 60°C

## Performance Features

Integrated design features including 360° lighting, PIR motion sensing, and advanced battery protection technology.

### Battery and Runtime

- 1500 Cycle Li-ion battery
- 10-year design lifespan
- Over 7 days of autonomy in rainy weather
- Automatic dusk-to-dawn operation

### Sensor Capabilities

- PIR motion sensor for energy saving
- 360° sensing angle

## Compliance and Standards

### Certifications

CE • RoHS • FCC • ISO • TUV SUD

### Design & Innovation

Yes
