

LED Spotlight with E26/E27 Base

This high-performance LED spotlight is designed for various lighting applications. It employs energy-efficient LED technology for long lifespan and reduced power consumption.

Product Overview

D-Spot Series LED Spotlight

The D-Spot Series is a high-performance LED spotlight engineered for versatility in both commercial and residential lighting environments. Designed with a robust construction and an integrated heat sink, it ensures efficient thermal management for a long operational lifespan. This energy-efficient solution is ideal for accent lighting, retail displays, and general illumination needs.

Technical Specifications

Base Compatibility	E26/E27 Screw Base
Key Features	Energy Efficient, Heat Sink Integration, Robust Construction, Long Lifespan

Applications

Recommended Applications

- Accent Lighting
- Retail Displays
- General Illumination
