

LED Stone Light

These LED lights are embedded in a stone-like material. They provide accent lighting for outdoor spaces such as gardens and pathways.

Product Overview

Innovative LED Stone Integration

The LED Stone Light features high-quality light sources embedded directly into a durable, stone-like textured housing. This unique design provides a robust and aesthetic lighting solution perfect for specialized architectural or decorative applications. The unit houses a cluster of five integrated LEDs capable of emitting vibrant colors, including red and blue, ensuring versatile visual output for professional projects.

Technical Details

LED Cluster	5 units
