

LED Street Light

This LED street light is designed for illuminating roadways, parking lots, and other outdoor spaces. It features long-life, low energy consumption, and provides instant-on operation.

Product Overview

High-Performance LED Street Lighting

This LED street light is engineered for efficient and reliable illumination across roadways, parking lots, and expansive outdoor environments. It features a robust, weather-resistant housing combined with advanced LED technology to ensure a long operational lifespan and significant energy savings. With high-output LED chips and precision optics, this unit delivers optimal light distribution, uniformity, and instant-on capabilities for both new installations and retrofits.
