Overview

High-Performance Roadway Illumination

This LED street light is engineered for efficient and reliable illumination of roadways, streets, and parking areas. Featuring a durable, robust housing with integrated heat sinks, it ensures optimal thermal management and long-lasting performance. Its streamlined design provides uniform light distribution, making it an ideal solution for both new installations and retrofitting existing lighting systems.

Technical Specifications

Housing Color	Gray
Mounting System	Pole mounting
Suitable Applications	Roadways, Streets, Parking Areas, Public Areas

Performance Features

Key Benefits

- Energy-efficient LED technology
- Optimized light distribution for safety
- Integrated heat sinks for thermal management
- Durable housing for reduced maintenance
