Product Overview

High-Performance LED Street Lighting

This high-performance LED street light is specifically engineered for efficient and reliable illumination of roadways, parking lots, and public areas. Constructed with a robust die-cast aluminum housing, it offers superior heat dissipation and corrosion resistance for long-term outdoor durability. The unit features high-efficacy LED chips that provide significant energy savings and a long operational lifespan, making it an ideal choice for municipal and commercial infrastructure projects.

Technical Specifications

IP Rating

IP65

Housing Material

Die-cast aluminum

Key Features

Corrosion Resistant, Weather Resistant, Energy Efficient, Easy Installation
