Product Overview

High-Efficiency Roadway Illumination

This LED street light is engineered for reliable performance in countryside and small road lighting applications. Constructed with a durable, die-cast aluminum housing and outdoor-grade acid spray painting, it ensures longevity in harsh environments. The integrated driver and radiator design effectively dissipates heat, significantly extending the fixture's operational lifespan.

Performance Metrics

Light Efficiency

115 lm/w
Max Efficiency

50000 hours
Max Lifespan

Technical Specifications

Housing Material	Die-cast aluminum
Adjustment Angle	-5° to 5°
Finish	Outdoor acid spray painting

Applications

Suitable Environments	Roads, Outdoors, Warehouse, Factory, Stadium
