

LED Street Light for Urban Illumination

This LED street light is designed for urban and residential area illumination. It features a durable weatherproof housing and an integrated LED array for optimal light distribution.

Product Overview

High-Efficiency Urban Illumination

This LED street light is engineered specifically for urban and residential environments, providing reliable and energy-efficient illumination. It features a robust, weatherproof housing designed to withstand outdoor conditions while ensuring long-lasting performance. With its integrated LED array, the fixture offers optimal light distribution, making it an ideal, low-maintenance solution for municipal and residential infrastructure projects.

Technical Specifications

Mounting Style	Pole Mount
Maintenance Requirement	Low-maintenance
Key Features	Weatherproof, Energy-saving, Integrated LED Array, Urban Optimized

Application

Suitable Environments

- Urban roads
- Residential areas
