

LED T Light Bulb, 5W-60W

The high wattage LED bulb provides enhanced brightness and good light distribution due to its innovative optics. It saves energy, offering a cost-effective lighting solution.

Product Overview

High-Performance LED T Light Bulb

This versatile LED T light bulb is designed for a wide range of lighting applications, offering an energy-efficient alternative to traditional incandescent or CFL bulbs. With multiple wattage options ranging from 5W to 60W, it provides flexible illumination solutions for residential, commercial, and industrial environments. Its robust construction ensures long-lasting performance, while the wide voltage range simplifies installation and operation.
