

LED T8 Tube Light

This LED T8 tube light is an energy-efficient replacement for fluorescent T8 tubes. It features a long lifespan, reduced energy consumption and provides instant-on illumination.

Overview

High-Efficiency LED T8 Illumination

This LED T8 tube provides a high-performance, energy-efficient replacement for traditional fluorescent lighting. Engineered with an industrial-grade design, it features a glass coating and durable injection-molded PC base for enhanced longevity. With a built-in driver and instant-on capabilities, this solution offers consistent, flicker-free illumination suitable for commercial, industrial, and residential environments.

Performance

Lumen Efficiency

150 lm/w

Lumen Efficiency

Performance Highlights

High Cost Performance • Instant-On • Flicker-Free

Construction

Design Features

- Industrial texture design
- Built-in driver
- Shatter-resistant construction
- Mercury-free
- Lead-free

Build Materials

Glass Coating, PC Base, Injection Molded
