

LED T8 Tube Light

LED T8 tube lights are available in 9W, 18W, and 24W power options. These tubes are designed as replacements for traditional fluorescent T8 tubes, offering energy savings and reduced maintenance.

Product Overview

High-Efficiency LED T8 Tube Light

This LED T8 tube light features an innovative design with a wide 320° viewing angle, providing uniform and consistent illumination. Engineered with advanced technology, it delivers high lumen output while serving as an excellent, energy-efficient replacement for traditional fluorescent tubes. The flicker-free operation ensures visual comfort, making it an ideal choice for offices, supermarkets, hospitals, and industrial environments.

Key Features

Certifications	CE Compliant
Common Applications	Office, Shopping Mall, Supermarket, School, Hospital, Plant
