Overview

Energy-Efficient LED T8 Solution

This LED T8 tube is designed as a high-performance, energy-efficient replacement for traditional fluorescent lighting. Engineered for durability and reliability, it offers instant-on illumination without flickering, making it an ideal choice for commercial environments like offices, warehouses, and retail spaces. With versatile wattage options and a high color rendering index, it delivers consistent, quality light while significantly reducing energy consumption and maintenance costs.

Technical Specifications

Available Wattages

- 9
- 18
- 24

Input Voltage	130-265V AC
Color Temperature Range	2700K - 6500K
LED Chip Type	SMD2835
