Product Overview

High-Performance LED Lighting Solution

This LED tail light assembly is specifically designed for 2020Y62 vehicles, offering a modern aesthetic combined with superior visibility. Engineered using high-quality raw materials, it ensures long-lasting performance and high resistance to environmental factors. The assembly provides a seamless 1:1 fit, serving as a direct replacement for factory units to enhance both vehicle safety and style.

Design & Fitment

Fitment Style	1:1 Original Factory Mold
Installation	Non-destructive installation using original car holes
Compatible Models	2020Y62, Y62

Technical Features

Integrated Lighting Functions

- Brake Lights
- Turn Signals
- Running Lights

Core Advantages

Energy Efficient • High Visibility • Durable Construction • Direct Replacement
