

LED Traffic Signal System with Countdown Timer

This traffic signal system utilizes LED lights with directional arrows and a digital countdown timer. The roadside control cabinet houses the electronic components for precise signal timing and coordination.

Overview

Advanced Traffic Management Solution

This LED Traffic Signal System is designed for robust urban traffic management, ensuring efficient and safe vehicle and pedestrian flow at intersections. The system integrates high-visibility LED traffic lights with directional arrows and a precise digital countdown timer. It includes a dedicated roadside signal control cabinet that houses the electronic components necessary for reliable signal timing and coordination.

Technical Features

Included Components

- LED Traffic Signal Heads
- Directional Arrow Indicators
- Digital Countdown Timer
- Roadside Signal Control Cabinet

Display Technology

High-intensity LED
