Product Overview

High-Efficiency LED Tube Lighting

This LED tube light serves as a durable, energy-efficient replacement for traditional fluorescent lighting. Designed for both commercial and residential applications, it features high-lumen SMD 2835 technology for superior brightness and cost-effectiveness. With robust heat dissipation construction and options for isolated or non-isolated power supplies, it offers reliable performance and a significantly longer lifespan than standard tubes.

Technical Specifications

Lifespan	20000 hours
Warranty Period	3 years
Color Rendering Index (CRI)	80 CRI
AC Voltage Tolerance	+/- 10%
Quality Control Aging	48 hours

Features & Construction

End Cap Options

- 180° rotatable
- Fixed

Power Input Configuration

- Single end input
- Double end input

Certifications

CE, RoHS

LED Technology

High lumen SMD 2835

Heat Dissipation Material

6063 Aluminum

Customization

OEM Capabilities

Yes
