

LED Tube Light with Diffused Housing

This LED tube light is an energy-efficient replacement for fluorescent tubes. It features a diffused polycarbonate housing and bi-pin connectors for easy installation.

Product Overview

Energy-Efficient Lighting Solution

This LED tube light serves as a high-performance, energy-efficient replacement for traditional fluorescent lighting systems. Designed with a diffused polycarbonate housing, it ensures soft, even light distribution suitable for a wide range of professional settings. Its standard bi-pin connector design allows for seamless integration into existing fixtures, making it an ideal upgrade for commercial, industrial, and residential environments.
