

LED Vapor Tight Fixture

The LED Vapor Tight Fixture is designed for demanding environments with moisture and dust. Its LED technology ensures long-lasting performance and energy savings.

Product Overview

Durable Industrial Lighting Solution

The LED Vapor Tight Fixture is a robust, energy-efficient lighting solution engineered for demanding environments. Designed to withstand moisture, dust, and corrosion, it is an ideal choice for parking garages, car washes, food processing plants, and industrial facilities. Featuring high lumen output and a wide beam angle, this fixture provides uniform illumination while delivering significant energy savings over traditional fluorescent lighting.

Key Features

Protection & Build

Vapor Tight • Moisture Resistant • Dust Resistant • Corrosion Resistant

Suitable Environments

Parking Garages, Car Washes, Food Processing Plants, Industrial Facilities

Technical Specifications

Construction

- Polycarbonate housing
- Sealed gasket system
