

LED Vapor Tight Light Fixture

The LED Vapor Tight Light Fixture is designed for demanding environments where moisture, dust, and corrosion are present. This durable fixture features a sealed enclosure to protect the internal components from harsh conditions.

Overview

Industrial-Grade Illumination

The LED Vapor Tight Light Fixture is engineered for demanding environments where moisture, dust, and corrosive elements are prevalent. Featuring a robust, sealed enclosure, this fixture protects internal components from harsh conditions while delivering bright, energy-efficient illumination. It is an ideal lighting solution for industrial applications such as car washes, parking garages, and food processing facilities, ensuring consistent performance and long-term reliability.

Application & Usage

Suitable Environments

Car Washes, Parking Garages, Food Processing Plants, Industrial Facilities

Features

Key Features

- Vapor-tight sealed enclosure
- Moisture and dust protection
- Energy-efficient LED technology
- Corrosion-resistant design
