

LED Vapor Tight Light Fixture

The LED Vapor Tight Light Fixture is a durable and energy-efficient lighting solution. Its sealed enclosure protects the LED components from environmental factors, providing bright, uniform illumination.

Overview

Durable Lighting for Demanding Environments

The LED Vapor Tight Light Fixture is a robust, energy-efficient lighting solution engineered for harsh environments. Designed to resist moisture, dust, corrosion, and impact, it is ideal for parking garages, warehouses, food processing facilities, and car washes. Its sealed enclosure ensures long-term reliability and minimal maintenance while providing bright, uniform illumination for enhanced safety.

Key Features

Suitable Applications

- Parking Garages
- Warehouses
- Food Processing Plants
- Car Washes

Protection Features

Vapor Tight, Dust Resistant, Corrosion Resistant, Impact Resistant, Moisture Resistant

Performance

Illumination

Bright Illumination • Uniform Light Distribution • Wide Beam Angle
