

LED Vapor Tight Light Fixture

This LED vapor tight light fixture is designed for environments where moisture, dust, and corrosion are present. It features a durable, sealed housing to protect the internal components from the elements. The fixture provides bright, energy-efficient illumination and is suitable for use in parking garages, warehouses, food processing plants, and other demanding applications.

Product Overview

Designed for Demanding Environments

This LED vapor tight light fixture is engineered specifically for environments where moisture, dust, and corrosion are prevalent. Featuring a durable, sealed housing, it provides robust protection for internal components while delivering bright, energy-efficient illumination. It is an ideal solution for parking garages, warehouses, food processing plants, and other industrial applications requiring long-lasting, low-maintenance lighting.

Key Features

Protection Features

Vapor Tight • Dust Resistant • Moisture Resistant • Corrosion Resistant

Suitable Environments

Parking Garages, Warehouses, Food Processing Plants, Industrial Facilities

Technical Specifications

Lighting Technology

LED

Maintenance Profile

Reduced maintenance costs due to long-life LED array

Installation

Designed for easy installation
