

LED Vapor Tight Light Fixture

The LED Vapor Tight Light Fixture is designed for demanding environments with moisture, dust, and corrosion. Utilizing energy-efficient LED technology, it delivers bright, uniform illumination while minimizing power consumption.

Product Overview

Durable Illumination for Demanding Environments

The LED Vapor Tight Light Fixture is engineered for environments where moisture, dust, and corrosion are significant concerns. Featuring a robust polycarbonate housing and a high-impact acrylic lens, it offers superior protection and longevity. This energy-efficient solution delivers uniform, bright illumination while ensuring complete ingress protection against environmental factors.

Technical Specifications

IP Rating

IP65

Key Features

- Sealed design
- Energy-efficient LED technology
- Corrosion resistant
- Dust and moisture proof

Construction Materials

Polycarbonate Housing, High-Impact Acrylic Lens, Stainless Steel Clips

Applications

Recommended Applications

Parking Garages, Warehouses, Food Processing Plants, Car Washes
