

Letter and Package Metal Detector for Security Screening

This metal detector is designed for security screening of letters and small packages. It is suitable for use in embassies, government offices, and postal inspection centers to detect metallic objects.

Overview

Security Screening Solution

This metal detector is engineered specifically for the security screening of letters and small packages. Its compact design makes it an ideal solution for government buildings, embassies, and high-security environments requiring reliable mail inspection. The system features a user-friendly interface with adjustable sensitivity settings to ensure accurate detection while maintaining operational efficiency.

Physical Specifications

Weight	17.5 kg
Dimensions (L x W x H)	360 x 460 x 240 mm
Channel Size (W x H)	400 x 70 mm

Power & Electrical

Power Consumption

7.5 VA

Power Consumption

Power Supply	AC85V ~ 265V, 50Hz ± 3Hz / 60Hz ± 3Hz
Spare Battery	12M 1.3LC
