

Lever-Actuated Butterfly Valve

This high-performance butterfly valve is designed for industrial applications. It is equipped with a lever-actuated mechanism for precise flow control and incorporates a resilient seat for tight shutoff.

Product Overview

High-Performance Lever-Actuated Butterfly Valve

This industrial-grade butterfly valve is designed for reliable flow control and tight shutoff performance. Featuring a robust construction with a resilient seat, it ensures durability across various industrial fluid applications. The integrated lever-actuated mechanism allows for precise operation and easy handling in demanding environments.

Technical Specifications

Actuation Type	Lever-actuated
Valve Type	Butterfly Valve
Key Features	Resilient Seat, Industrial Grade, Tight Shutoff, Flange Mounting

Logistics and Packaging

Standard Packaging

- Plastic film wrapping
- Wooden pallet reinforcement

Shipping Methods

- Sea Freight
- Air Freight
- Express Courier
