

Lever Block Hoist

This lever block is a robust lifting device for construction and industrial applications. It features a durable chain and heavy-duty hook for secure lifting operations.

Product Overview

Industrial Lifting Performance

The Model HSH-A Lever Block is a robust and reliable lifting device designed for demanding industrial and construction environments. Engineered for versatility, it excels in lifting, pulling, and tensioning tasks while maintaining a compact profile for use in confined spaces. With a durable chain and heavy-duty hook construction, this hoist ensures secure operation and long-term durability for professional users.

Technical Specifications

Key Features

- Durable chain construction
- Heavy-duty hook
- Ergonomic handle
- Compact design for confined spaces

Model Number	HSH-A
Applications	Lifting, Pulling, Tensioning, Industrial, Construction
