

Lever Operated Hoist with Steel Wire Rope

This lever-operated hoist is designed for lifting, pulling, and securing loads. It features a robust construction, high strength steel wire rope, and a lever mechanism for controlled operation.

Product Overview

Professional Lever Operated Hoist

This lever-operated hoist is engineered for demanding lifting, pulling, and load-securing tasks in industrial and construction environments. Built with a high-strength steel wire rope and a robust mechanical design, it ensures reliable performance and durability under load. The inclusion of integrated safety features, such as overload protection and a secure grip mechanism, makes it an essential tool for safe and controlled operations.

Technical Specifications

Hoist Type	Lever Operated
Rope Material	Steel Wire

Features

Safety Features	Overload Protection, Secure Grip
