Product Overview

Reliable Flow Control

This lever-operated isolation valve provides a robust and economical solution for flow control in various plumbing and heating applications. Designed for efficient isolation and maintenance of specific pipework sections, it ensures a secure, leak-free connection. The lever handle allows for quick and easy on/off operation, making it an ideal component for HVAC&R systems.

Technical Specifications

Connection Size	15mm x 15mm
Product Code	E00006
Operation	Lever Operated

Manufacturing Standards

Industry Expertise	20 years
Manufacturing Features	Green Manufacturing, Cost Efficient, Quality Guaranteed
