Product Overview

Professional Lever-Operated Wire Connectors

These compact lever-operated wire connectors are designed to simplify electrical installations in space-constrained environments like distribution boxes. Featuring a transparent, flame-resistant housing, they allow for quick, safe, and reliable connections of both solid and stranded wires. The intuitive lever mechanism enables tool-free installation and removal, making them an ideal solution for efficient building, residential, and commercial wiring projects.

Technical Specifications

Solid Wire Capacity	4 mm ²
Stranded Wire Capacity	2.5 mm ²
Housing Safety Standard	UL94 V0 Flame Resistant

Certifications

Product Certifications

CE • RoHS • UL • TUV • CQC

Key Features

Top Benefits

- Compact design for high wiring density
- Tool-free lever operation
- Transparent housing for visual inspection
- Supports both solid and stranded wires
- Flame-resistant safety material
