

Light-Duty Dump Truck

This light-duty dump truck features a compact design and sturdy build. It is equipped with a reinforced steel dump bed and dual rear wheels, making it suitable for urban construction and landscaping.

Overview

Compact Power for Urban Logistics

This light-duty dump truck is engineered for efficiency in confined spaces, featuring a compact design and a short wheelbase that ensures excellent maneuverability. Built with reinforced steel sides and a hinged tailgate, the dump bed is optimized for reliable material transport in urban construction and landscaping environments. Its cab-over engine configuration maximizes cargo capacity, while dual rear wheels provide the stability needed for heavy loads.

Technical Specifications

Design Configuration	Cab-over engine
Bed Construction	Reinforced steel
Wheel Setup	Dual rear wheels

Key Features

Vehicle Attributes

Compact Design • High Maneuverability • Reinforced Build

Best For	Urban Construction, Landscaping, Material Transport
