

Light Tie Rod Hydraulic Cylinder

This hydraulic cylinder features a light tie rod construction. It is designed for applications requiring linear force and controlled movement.

Overview

Light Tie Rod Hydraulic Cylinder

This light tie rod hydraulic cylinder is engineered for applications requiring reliable linear force and controlled movement. Featuring a durable tie rod construction, the design allows for straightforward disassembly and simplified maintenance routines. It is built to withstand standard industrial operating pressures, making it a versatile component for various hydraulic systems.

Technical Specifications

Max Pressure Rating

1500 PSI
Max Pressure

Model Number	1500X02.25-TB
Part Number	3607.02.06

Design Features

Construction Type

Tie Rod • Light Duty

Maintenance Features

- Easy disassembly
- Simplified maintenance
- Accessible fluid ports
