

Lightweight Nitrile Coated Work Gloves

These lightweight and flexible nitrile-coated work gloves provide excellent grip and dexterity. They are designed for general-purpose tasks requiring tactile sensitivity and protection against abrasion.

Overview

Lightweight Nitrile Coated Work Gloves

These lightweight and flexible nitrile-coated work gloves are engineered to provide excellent grip and superior dexterity for precision tasks. Designed for general-purpose applications, they offer essential protection against abrasion while maintaining high tactile sensitivity. Ideal for professionals in construction, manufacturing, and maintenance environments.

Technical Specifications

Size	XL
Certifications & Standards	CE, EN388 4121X
Model Identifier	HGV021

Features

Key Benefits

- Lightweight construction for extended wear
- Nitrile coating for enhanced grip
- High tactile sensitivity for precision work
- Abrasion-resistant design
