Product Overview

Reliable Power Protection

This line interactive Uninterruptible Power Supply (UPS) is engineered to safeguard sensitive electronic equipment against power outages, voltage sags, and surges. With capacities ranging from 400VA to 1000VA, it provides a stable power environment for desktop computers, routers, and network workstations. Advanced features like automatic voltage regulation and intelligent battery management ensure long-term reliability and equipment safety.

Performance & Power

Capacity Range

400 VA

Minimum Capacity

1000 VA

Maximum Capacity

Key Features

Core Features

Auto Sensing Frequency, Wide Input Voltage Range, Cold Start, Auto Restart, Automatic Voltage Regulation

Protection & Safety

System Protections

- Short circuit protection
- Battery overcharge protection
- Battery overdischarge protection
- Overload protection
- Surge protection

Connectivity & Management

Management Interfaces

- USB Interface for PC communication
- Unattended safety shutdown
- System alarm
- Auto Power-On/Off via USB

Optional Features

Yes
