

# Line-Interactive Uninterruptible Power Supply (UPS)

Line-interactive UPS featuring a built-in smart charger. It provides stable output even when the battery is low and is compatible with generators.

## ADDITIONAL IMAGES

## Product Overview

### Reliable Power Protection

This line-interactive uninterruptible power supply (UPS) provides essential backup power and voltage regulation for computers and sensitive electronic equipment. It ensures continuous operation during power outages by automatically switching to battery power, while simultaneously protecting devices from damaging voltage fluctuations and spikes. Designed for homes, offices, and small businesses, this unit helps prevent data loss and extends the lifespan of connected hardware.

## Electrical Specifications

Input Voltage Range	80V-140V / 165V-275V / 140V-275V
Output Voltage Options	110V, 120V, 220V, 230V

## Features

### Key Features

- Automatic battery charging while UPS is off
- Frequency synchronization with mains power
- Smart audible alarm system
- 3-color LED status indicator

### Ideal Applications

PC Backup • Home Office • Networking Equipment • Small Business
