

# Line Interactive Uninterruptible Power Supply (UPS)

This line interactive UPS provides reliable power protection with voltage regulation and surge protection. It features an LCD display, microprocessor-based digital control, and simulated sine wave output.

## ADDITIONAL IMAGES

## Overview

### Reliable Power Protection

This line interactive Uninterruptible Power Supply (UPS) provides essential protection for sensitive electronic equipment. Featuring microprocessor-based digital control and automatic voltage regulation (AVR), it ensures stable power output and safeguards against voltage fluctuations and outages. Designed for versatility, this unit includes intelligent battery management and multiple protection mechanisms, making it an ideal choice for home and office workstations.

## Performance & Capacity

### Model Specifications

Model	Capacity (VA)	Capacity (W)
EA245i	450	240
EA265i	650	360
EA275i	750	420
EA285i	850	480
EA2120i	1200	720
EA2150i	1500	900
EA2200i	2000	1200

## Key Features

### Safety Protections

Short Circuit Protection • Over Discharged Protection • Auto-Diagnosis • Auto Restart

### Core Functionality

LCD Display, Microprocessor Control, Boost and Buck AVR, Frequency Adaptive, Simulated Sine Wave Output, Intelligent Battery Management

## Connectivity & Options

### Optional Communication & Protection

- RS232 Communication Port
- USB Communication Port
- RJ11 Protection
- RJ45 Protection

## Operational Modes

### Operational Capabilities

- Cold Start Capability
- Auto-charging in UPS off mode
- Humanized Alarm System
