

Line Press Cap Crimping Pliers

These crimping pliers are designed for line press cap applications. They provide precise crimping for secure and reliable connections in electrical and electronic tasks.

Product Overview

Professional Cold Press Pliers

The HS-8 cold press pliers are specifically engineered for line press cap applications, ensuring reliable and precise connections. Designed for use with nickel terminals, this tool utilizes an indent crimping mechanism to deliver consistent results. Its robust construction and ergonomic design make it an essential tool for electrical and electronic assembly tasks requiring high-quality crimps.
