

Linear Grinding Stone for Electric Tools

This linear grinding stone is designed for use with electric tools and accessories. It is ideal for deburring, edge breaking, and surface finishing on a variety of materials.

Product Overview

Versatile Linear Grinding Solution

This linear grinding stone is engineered for professional use with electric tools and accessories, offering exceptional versatility for surface finishing tasks. It is specifically designed for precise deburring and edge breaking, making it an ideal choice for intricate work and tight spaces. The durable abrasive composition ensures long-lasting performance and consistent material removal with minimal heat generation.

Technical Specifications

Performance Features

- Durable abrasive composition
- Consistent material removal
- Minimal heat generation
- Precise and controlled grinding

Shape

Linear

Primary Applications

Deburring, Edge Breaking, Surface Finishing

Compatibility

Compatible with various electric tool attachments
