

Linear Shower Floor Drain

This linear floor drain is constructed from stainless steel. It features adjustable leveling feet and a slotted grate design for efficient water drainage.

Product Overview

High-Performance Linear Drainage Solution

This stainless steel linear floor drain is engineered for high-efficiency water management in professional and residential wet areas. Featuring a robust, corrosion-resistant construction, it ensures long-term durability and reliability. The design includes adjustable leveling feet for precise installation and a slotted grate optimized for rapid water flow.

Technical Specifications

Material	Stainless Steel
Drain Type	Linear
Installation Features	Adjustable leveling feet, Central drain outlet

Key Benefits

Performance Highlights

1 High

Corrosion Resistance

1 Optimized

Drainage Efficiency

Applications

Recommended Use

- Showers
- Bathrooms
- General wet areas
