

Linear Slot Diffuser for HVAC Systems

This linear slot diffuser is designed for HVAC systems. Constructed from white plastic or coated metal, it features a slotted design for directing airflow.

Overview

High-Performance Linear Slot Diffuser

This linear slot diffuser is engineered for efficient and uniform airflow distribution in residential and commercial HVAC systems. Featuring a sleek, minimalist design, it integrates seamlessly into ceilings or walls while providing precise control over air direction. The durable construction ensures long-lasting performance, making it an ideal solution for modern climate control applications.

Technical Specifications

Suitable Environments

- Residential HVAC
- Commercial HVAC
- Office Buildings
- Retail Spaces

Installation

Ceiling Mount • Wall Mount

Material

Coated Metal/Plastic

Design Features

Linear Slot, Adjustable, Rectangular
