Overview

Professional Linear Stretch Wrapping Solution

This linear stretch wrapping machine is engineered for high-efficiency end-of-line packaging. It features advanced tension control and automated height detection to ensure secure, stable, and material-efficient wrapping for a wide variety of palletized loads. Designed with robust components and safety-first engineering, this system offers reliable performance for demanding industrial environments.

Technical Specifications

Model Number	JT-2000
Turntable Diameter	1500mm / 1800mm
Max Wrapping Height	2100mm / 2400mm
Max Wrapping Area	1300 x 1300 mm
Max Wrapping Weight	2000 kg

Performance

Pre-stretch Tension Range

0 % Min Tension	250 % Max Tension
---------------------------	-----------------------------

Turntable Speed	2-15 rpm
-----------------	----------

Key Features

Operational Highlights	Soft Start/Stop, Automatic Height Detection, Automatic Film Breaking, Turntable Orientation, Self-Protection Sensors
------------------------	--

Design & Construction

Construction Benefits

- 12-roller support system for smooth operation
- High-strength belt drive system (replaces chain)
- Integrated U-model chassis for turntable protection
- Rear-positioned hatch for convenient access
- Imported electrical components with aero sockets
